The screenshot displays the European Commission's Digital Single Market website. At the top, the European Commission logo and the text 'DIGITAL SINGLE MARKET' and 'DIGITAL4SCIENCE' are visible. Below this, a navigation bar includes links for 'About', 'Discussions', 'Library', 'Blogs', 'Polls', and 'Events'. The main content area features a section titled 'What is the future of open access publishing?' with a sub-header 'Alternative open access publishing models'. A sidebar on the left lists 'Research and innovation', 'Innovation', and 'Digital Infrastructures'. The main heading 'EC Workshop on Alternative Open Access Publishing Models' is prominently displayed.

A different angle

# A different angle

Imagine writing the history of print from the perspective of the scriptoria...

1) **What will it be like?** The question can be framed in two ways:

The first is the scriptorium way: how to adapt the present to the (yet unknown) future.

Open Access debate has followed this path.

The second way, more fundamentally, strongly foregrounds the notion of “scientific communication”: **WHAT DOES IT NEED TO WORK BEST?**

- a set of useful, credible, peers;

- “crystals” of knowledge

2) **Who will control it?**

Science is....

Collaboration,  
NOT competition

Quality,  
NOT excellence

Evaluation on the QUALITY of  
works, not the prestige [IF] of  
journals

Fluid approach to contributions  
[as free software coding]

## About OLH

The Open Library of Humanities (OLH) is a charitable organisation dedicated to publishing open access scholarship with no author-facing article processing charges (APCs). We are funded by an international consortium of libraries who have joined us in our mission to make scholarly publishing fairer, more accessible, and rigorously preserved for the digital future.

The OLH publishing platform supports academic journals from across the humanities disciplines, as well as hosting its own

Tools: peer review for quality, DOI for ID, CLOCKSS for preservation, Altmetrics for impact...

ENABLING RESEARCH THROUGH OPERAS FUTURE GOVERNANCE MODEL OA FOR SSH A BIBLIOGRAPHY

WHAT IS OPERAS?

OPERAS is a project for a new infrastructure in Europe to support the development of open access publishing in humanities and social sciences. The Infrastructure will aim at strengthening SSH research and

Improving research output by providing new approaches to impact and measurement of academic merit. It will help breaking the stronghold of conventional publishing over research output and help

## Commissioner Moedas and Secretary of State Dekker call on scientific publishers to adapt their business models to new realities

### JOINT STATEMENT

Commissioner Moedas and Secretary of State Dekker call on scientific publishers to adapt their business models to new realities

Brussels, 12 October 2015

In Horizon 2020, the EU's research and innovation programme, all costs for open access are eligible for reimbursement during the duration of the project. However, the Commissioner warned that the Commission will adapt this policy if it finds that publishers are charging excessive article processing charges for opening access to articles.
